PROJECTS

Real Time Sign Language Detection

- A real-time sign language translator helps communication between the deaf and mute community and the general public.
- The main purpose of this project is to demonstrate a methodology that simplified Sign Language Recognition using MediaPipe's open-source framework and machine learning algorithm.

Bike, Car, House Price Prediction

- These projects are made with machine learning algorithms which have one purpose to predict the objects price based on given fields.

Plasma Donation

- A simple app to store the details of people who are willing to donate plasma and show the details of those people who need plasma.

Daily Journal

- A simple daily journal app made with plain html, css and expressjs
- With CRUD functionalities
- <https://github.com/swojas/daily-journal>
